PROFESSIONAL SUMMARY

22-year-old engineering student. Passionate about software engineering, with a strong interest in system design, architecture, and building maintainable solutions. Known for continuous learning, perseverance, and a proactive approach to solving complex pro blems.

TOOLS

Technologies | Java, Go, JavaScript, Haskell, Scala, Ruby, Spring, NodeJS, SQLServer, MySQL, MongoDB, Git
Languages | Spanish: Native - English : Advanced - Portuguese: Basic

EXPERIENCE

Teaching Assistant **Mar 2025 - Present**
Programming Paradigms Course - UTN FRBA CABA Argentina

- Collaborated in the design, preparation, and delivery of course materials, prog. assignments, and exams.
- Mentored students in understanding and applying core programming concepts through practical exercises, fostering critical thinking and problem-solving skills.

IT Consultant **Jan 2021 - Feb 2023**
Pinturerías Casa Seca Bs. As. Argentina

- Designed and developed the company's first relational databases, applying normalization principles and industry best practices, significantly reducing the time required for employees to register and process sales.
- Worked extensively with spreadsheets, Power BI, databases, and Python to support data analysis, reporting, and business intelligence initiatives.

EDUCATION

Information Systems Engineering – *Score average of 7.5* Apr 2023 - Present
Universidad Tecnológica Nacional (UTN) – FRBA CABA Argentina

Bilingual High School Diploma in Social Sciences with Honors – *Score average of 9.02* Mar 2017 - Dic 2022
Glasgow College Bs. As. Argentina

International General Certificate of Secondary Education with Merit Apr 2020 - Nov 2022
University of Cambridge Bs. As. Argentina

First Certificate in English – C1 Advanced – 185 score Nov 2021
University of Cambridge Bs. As. Argentina

PROJECTS

Operating System from Scratch | *GoLang, multi threads, concurrency, API REST* Apr 2025 – Jul 2025

- Divided into three modules communicating through HTTP calls, using multithreading and concurrency.
- Led the development of the Memory module, responsible for resource allocation and management for each process, ensuring optimal performance based on predefined metrics and functional requirements.

Full-Stack Incident Management Web Application | *Java, SpringBoot, AWS, Docker* Apr 2025 - Dec 2025

- Developed backend using Java and Spring, and built the frontend with HTML, CSS, JavaScript, and Thymeleaf.
- Designed a scalable microservices architecture with RESTful APIs to enable efficient communication between services and support platform scalability.
- Deployed the app with AWS, orchestrating Docker containers for each microservice in a production environment.

Travel Database & Business Intelligence Platform | *SQL Server, T-SQL, ETL, BI* May 2026 - Jul 2026

- Designed and implemented a relational database in 3NF, modeling domain and migrating from denormalized tables.
- Designed a star-schema and analytical views to support Business Intelligence reporting and decision-making.

Full-Stack Medical Appointment Platform | *React, Node.js, JS, MongoDB, OCI, Docker* Apr 2026 - Jul 2026

- Developed the frontend in *React* and implemented the backend with *JavaScript*, *Node.js*, and *Express*, designing a *RESTful API* to manage business logic, data persistence (MongoDB), and client-server communication.
- Led the production deployment on Oracle Cloud Infrastructure using Docker and Docker Compose, with NGINX as a reverse proxy and load balancer, and Portainer for container orchestration and monitoring.
